The Row House Reborn

Architecture and Neighborhoods in
New York City, 1908–1929

Andrew Scott Dolkart

In the decades just before and after World War I, a group of architects, homeowners, and developers pioneered innovative and affordable housing alternatives. They converted the deteriorated and bleak row houses of old New York neighborhoods into modern and stylish dwellings. This movement—an early example of what has become known as “gentrification”—dramatically changed the physical character of these neighborhoods.

“Dolkart investigates an important, yet largely ignored, chapter in New York housing. This is the first detailed historical study to focus on the process and product of housing rehabilitation in the U.S.”

BUILDINGS OF PENNSYLVANIA Pittsburgh and Western Pennsylvania

LU DONNELLY, H. DAVID BRUMBLE IV,
and FRANKLIN TOKER

Buildings of Pennsylvania: Pittsburgh and Western Pennsylvania considers the architecture, landscape, and town plans of thirty-one counties west of Blue Mountain and north to Lake Erie, including cities and communities big and small, from Pittsburgh, Beaver Falls, Johnstown, and Altoona to Bellefonte, State College, Lock Haven, Clarion, and Erie, and scores of places in between. The first comprehensive look at the built environment in this large and varied territory, the volume spans the years from the late eighteenth century through to the first decade of the new millennium and reveals a range of architectural surprises.

BUILDINGS OF DELAWARE

W. BARKSDALE MAYNARD

"Buildings of Delaware should prove to be an indispensable reference book. The book's value lies in its excellent maps, historic and modern illustrations, logical organization, and extensive research into the construction dates and architects. It's not just interesting reading but also the best guide to those who want to tour Delaware since the 1938 Federal Writers' Project Guide to Delaware." —*Wilmington News Journal*

MELODRAMATIC LANDSCAPES Urban Parks in the Nineteenth Century

HEATH SCHENKER

During the nineteenth century, large, naturalistic urban parks began to appear in cities around the world. These parks, as *Melodramatic Landscapes* engagingly demonstrates, offered the opportunity for visitors to assert their social status in performances suited to the theatrical age in which they flourished. Focusing on iconic parks in Paris, New York, and Mexico City, Heath Schenker explores the cultural and social meanings embedded in these elaborate stage sets.

SHAPING THE AMERICAN LANDSCAPE

New Profiles from the Pioneers of American Landscape Design Project

Edited by CHARLES A. BIRNBAUM
and STEPHANIE S. FOELL

Shaping the American Landscape explores the lives and work of 149 professionals who quite literally shaped both the land itself and our ideas of what the American landscape means. Although the contributors consider many important figures from the past, the book breaks new ground by including seminal designers who are in their twilight years—and in some cases still professionally active—to provide a fascinating look at the modern era of design in action. The roster of profiles extends far beyond landscape architects to encompass professionals in many other fields, including planning, journalism, gardening, and golf course and cemetery design.
